The Academic Research group BCRED (see information below) and dr. Jan Magnus Sjögrens' research is focused on Biomarker and Clinical aspects of Eating Disorders. This includes:

Defining psychopathology including comorbidities and subgroups in Eating Disorders

Identifying trait, prognostic and pathophysiological biomarkers of Eating Disorders such as Anorexia and Bulimia Nervosa

Characterizing emotional dysregulation, cognition, body image and motivation, in Anorexia and Bulimia Nervosa

Via a better understanding of the pathophysiology and psychopathology of Eating Disorders, identify improved treatments for Anorexia Nervosa and Bulimia Nervosa.

For BCRED (see below), Jan Magnus Sjögren has established collaborat

Professor Cynthia Bulik, North Carolina University, USA, and Karolinska Institute, Sweden

Professor Janet Treasure, Kings College, London, UK
